

Rewind Staging for Shopify

Rewind Staging helps merchants manage multiple Shopify stores with a continuous sync and automated store copies. Save yourself the pain of manually duplicating Shopify stores and prevent mistakes with an accurate staging environment.

✓ Prevent risky changes. Innovate faster.

Unvetted changes can break your store—unless you're using your sandbox store as a staging environment to prevent disasters. Sandboxes are only as good as the data they contain. Enjoy a sandbox test store with sample data to try out theme, code, and other changes without any risk of negatively affecting your live store.

✓ Save time. Sell more.

Clone or duplicate products, blogs, themes, pages, collections, and more. Create a better customer experience by launching multi-currency and multi-language stores without spending hours building from scratch and keeping them in-sync.

Pro Tip: Are you a Shopify Plus customer?

With your Shopify Plus subscription, you get access to a [free sandbox store](#). Set it up and install Rewind Staging Unlimited to maintain an accurate staging environment.

What Rewind Staging can do

- Products, product images, and product metafields
- Collections, both smart collections and custom collections
- Themes and theme assets
- Your blog and blog posts
- Pages
- Files and images uploaded within the theme editor (such as: logo, slideshow images, etc.)

What Rewind Staging can't do

- Third-party apps (and their respective data)
- Inventory
- Metadata for collections
- Shipping zones/rates
- Store settings
- Customers
- Navigation (Store Menus)
- Orders

Pricing

Unlimited

\$99 USD / Month

+\$29/each additional store

- ✓ Continuously copy and sync stores
- ✓ Exclude items from continuous copy
- ✓ Copy product metafields

1. Contact help@rewind.com to request access to this beta feature. Only available to customers on the Unlimited plan.
2. If the theme being used originated from the Shopify Theme Store, a valid purchase of that theme is required for each store account for a valid license to use such theme.

"It's much quicker to install Rewind Staging to copy our store (and everything in it), than it is to pay a developer to do it manually". – Jonas Forth, Head of Digital at Moomin

Frequently Asked Questions

Q: How many items can I sync to my staging environment?

A: There are no limits or restrictions on the number of items being synced. Rewind Staging can sync data from one store to multiple stores, all at once.

Q: Can I exclude items from Staging?

A: Users on the Unlimited plan can exclude some product details, including prices, images, and more, so you can keep products up-to-date across multiple stores without overwriting shop-specific details.

Q: I'm a visual learner. Can I watch a video instead?

A: You sure can. Check out this [5-minute video](#) to learn how to use Rewind Staging for Shopify.
